Advancing the world class Julimar PGE-Ni-Cu-Co-Au discovery

Red Cloud Webinar Presentation
27 January 2021
Forward looking statements and disclosures

This presentation does not include all available information on Chalice Mining Limited and should not be used in isolation as a guide to investing in the Company. Any potential investor should also refer to Chalice Mining Limited Annual Reports, filings on sedar.com, and to ASX/OTCQB releases and take independent professional advice before considering investing in the Company. For further information about Chalice Mining Limited, visit the website of chalicemining.com

Forward-Looking Statements

This document may contain forward-looking information within the meaning of Canadian securities legislation and forward-looking statements within the meaning of the United States Private Securities Litigation Reform Act of 1995 (collectively, forward-looking statements). These forward-looking statements are made as of the date of this document and Chalice Mining Limited/Company does not intend, and does not assume any obligation, to update these forward-looking statements. Forward-looking statements relate to future events or future performance and reflect Company management’s expectations or beliefs regarding future events and include, but are not limited to, the Company’s strategy, the fair value of investments, the estimation of mineral reserve and mineral resource estimates, the likelihood of exploration success at the Company’s projects, the prospectivity of the Company’s exploration projects, the existence of additional EM anomalies within the project, the timing of future exploration activities on the Company’s exploration projects, planned expenditures and budgets and the execution thereof, the timing and availability of drill results, potential sites for additional drilling, the timing and amount of estimated future production, costs of production, capital expenditures, success of mining operations, environmental risks, unanticipated reclamation expenses, title disputes or claims and limitations on insurance coverage. In certain cases, forward-looking statements can be identified by the use of words such as “plans”, “intend”, “believe”, “expect”, “could”, “would”, “might”, “will”, “will be”, “would”, “may”, “anticipate”, “estimate”, “scheduled”, “forecasts”, “intends”, “prospects”, “anticipates”, “should”, “be”, “or do not expect”, “is”, “highly”, “terminal”, “potentially”, “likely” or “be achieved”, or variations of such words and phrases or statements that certain actions, events or results may, could, would, might or will be taken, occur or be achieved or at the negative of these terms or comparable terminology. Their very nature forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company to materially differ from any future results, performance or achievements expressed or implied by the forward-looking statements. Such factors may include, among others, risks related to actual results of current or planned exploration activities; assay results of visually interpreted mineralised intersections; obtaining appropriate access to relevant freehold properties and the Julimar State Forest; whether geophysical anomalies are related to economic mineralisation or some other feature; obtaining access to undertake additional ground disturbing exploration work on EM anomalies located in the Julimar State Forest; the results from testing EM anomalies; results of planned metallurgical test work; changes in project parameters as plans continue to be refined; changes in exploration programs based upon the results of exploration, future prices of mineral resources; grade or recovery rates of accidents, labour disputes and other risks of the mining sector in general; availability of suitable equipment or financing or in the completion of development or construction activities; movements in the share price of investments and the timing and proceeds realised on future disposals of investments, the impact of the COVID 19 pandemic as well as those factors detailed from time to time in the Company’s interim and annual financial statements, all of which are filed and available for review on SEDAR at sedar.com, ASX at asx.com.au and OTC Markets at otcmarkets.com. Although the Company has attempted to identify important factors that could cause actual actions, events or results to differ materially from those described in forward-looking statements, there may be other factors that cause actions, events or results not to be as anticipated, estimated or intended. There can be no assurance that forward-looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements.

Competent Person and Qualifying Persons Statement

The information in this presentation that relates to exploration results for the Julimar Project is extracted from the following ASX announcement:

• “High-grade nickel-copper-palladium sulphide intersected at Julimar Project in WA”, 23 March 2020

• “Preliminary results from second target at Julimar Project”, 24 March 2020

• “Significant nickel-palladium discovery confirmed at Julimar”, 15 April 2020

• “Second diamond hole intersects discovery zone at Julimar”, 20 April 2020

• “Exciting visual results from deep diamond drill hole at Julimar”, 5 May 2020

• “Large-scale PGE system further expanded at Julimar”, 11 May 2020

• “High-grade Ni-Cu-PGEs confirmed in discovery zone at Julimar”, 25 May 2020

• “Extension of wide, high-grade PGE-Ni-Cu matrix zone at Julimar”, 15 June 2020

• “Chalice discovers new high-grade PGE-CuAu zone at Julimar”, 9 July 2020

• “Significant extension of high-grade PGE-Ni-Cu-Co zones at Julimar”, 17 August 2020

• “Positive preliminary metallurgical results at Julimar”, 1 September 2020

• “Major new 6.3km-long EM anomaly identified at Julimar”, 22 September 2020

• “Significant new PGE-copper-gold horizon defined at Julimar”, 6 October 2020

• “Key Private Properties Secured at Julimar”, 16 November 2020

• “Significant high-grade PGE-Cu-Au extensions at Julimar”, 18 November 2020

• “Chalice secures access to major new targets at Julimar”, 4 January 2021

• “Four new high-grade zones defined as Julimar continues to grow”, 27 January 2021

The information in this presentation that relates to the exploration results for the Pyramid Hill Project is extracted from the following ASX announcements:

• “Discovery of new >2km gold trend in air-core drilling at Kanti Target indicates potential for a significant gold system”, 12 December 2019

• “Several new nickel zones discovered in first drill holes at Ironbank North Target”, 19 December 2019

• “Kanti gold trend expanded to over 3km of strike extent”, 13 January 2020

• “Infill AC drilling at Kanti returns best intercept to date of 4m at 4g/l gold”, 3 February 2020

• “New High-Grade Gold Zones at the Large-Scale Kanti Target”, 4 March 2020

• “First diamond drill hole at Kanti hits primary gold zone”, 7 April 2020

• “Maiden diamond drill program at the Pyramid Hill Gold Project confirms a large gold system at the Kanti Prospect”, 29 July 2020

The information in this presentation that relates to exploration results for the Hawkstone Project (formerly the King Leopold Project) is extracted from the following ASX announcements:

• “Chalice acquires highly prospective nickel sulphide project in west Kimberley region of WA”, 18 June 2019

• “Strong EM Conductors Identified at King Leopold Project”, 20 August 2019

The above announcements are available to view on the Company’s website at chalicemining.com. The Company confirms that it is not aware of any new information or data that materially affects the information included in the relevant original market announcements.

The Company confirms that the form and context in which the Competent Person and Qualified Persons’ findings are presented have not been materially modified from the relevant original market announcements.
A unique exploration specialist with a globally significant discovery

Julimar – a new high-grade PGE-Ni-Cu-Co-Au discovery in WA

• Australia’s first major palladium discovery
• Emerging as a very large, strategic deposit of critical clean energy metals
• Highly leveraged to large-scale battery (Ni-Co) and hydrogen (PGEs-Ni) adoption

Unrivalled pipeline of greenfield discovery opportunities in Australia

• ‘First mover’ advantage in the new West Yilgarn Ni-Cu-PGE Province
• Large exploration holdings in Victoria and the Kimberley
• 9 rigs currently drilling across 2 projects

Well funded, high performance team with an excellent track record

• Proven ability to discover and define mines
• ~A$148M\(^1\) in cash + investments
• >2,000% TSR since 1 January 2020

\(^1\) Pro forma at 31 December 2020 (including SPP in January)
Chalice’s portfolio includes the exciting **Julimar discovery** in the new West Yilgarn Ni-Cu-PGE Province in WA + a pipeline of generative opportunities.

### Julimar Nickel-Copper-PGE Project, WA
- **New** greenfield PGE-Ni-Cu-Co sulphide discovery in Mar-2020
- 19m @ 8.4g/t Pd, 2.6% Ni, 1.0% Cu, 0.1% Co in 1st hole
- 100% owned, ~26km long intrusive complex ~70km NE of Perth
- 6 rigs drilling, targeting maiden Mineral Resource mid-2021

### Pyramid Hill Gold Project, Vic
- **New >4km gold** trend + 2 gold bearing diorite intrusions
- >5,000km² holding NW and NE of Fosterville Gold Mine
- 100% owned, all under cover in unexplored terrane
- 2 diamond rigs drilling at the Karri Prospect + 1 AC rig drilling

### Hawkstone Nickel-Copper-Cobalt Project, WA
- **New** greenfield nickel sulphide opportunity in frontier province
- >1,800km² holding east of Merlin Ni-Cu-Co prospect (IGO/BUX)
- 85-100% owned, several large untested dolerite intrusions
- Maiden drill program recently completed

### Several generative exploration opportunities, investments, royalties and non-operated joint ventures
Chalice is one of the **top performing companies** in the ASX All Ordinaries with >2,000% TSR since January 2020

**CHN Share Price Chart (A$/share)**

- **$30M Capital Raise at $1.05**
- **Major discovery confirmed at Julimar with mineralisation in first six holes at 1.6km x 0.7km Gonneville Intrusion**
- **19m @ 8.4g/t Pd, 2.6% Ni, 1.0% Cu, 0.1% Co from 48m in 1st hole at Julimar**
- **Significant PGE-Cu-Au horizon defined on Eastern Contact**
- **$100M placement at $3.75**
- **Key properties purchased, 6th and 7th high-grade zones discovered**
- **State Forest access approval**
- **$15M SPP and 11th high-grade zone discovered**
- **6.5km Hartog EM Anomaly defined within Julimar State Forest**
- **Major extension of 3 high-grade PGE-Ni-Cu-Co zones**
- **$100M placement at $3.75**
We have a **tight capital structure**, a **strong financial position** and a **growing institutional register**

---

1. As of December 2020 (estimate based on top 20 extract of the share register)

2. Pro forma as of 31 December 2020 (and includes SPP that settled in January 2021)
Julimar Nickel-Copper-PGE Project

Western Australia
High-grade PGE-Ni-Cu-Co was intersected in the very first drill hole at Julimar – a remarkable new discovery in a completely new province

- ~70km NE of Perth, with direct access to major highway, rail, power and port infrastructure
- ~26km long layered mafic-ultramafic intrusive complex (Julimar Complex) with no previous Ni-Cu-PGE exploration
- Staked in early 2018 (100% owned)
- Exploration so far restricted to the ~1.6km x >0.8km Gonneville Intrusion at the southern end of the Complex on private land – initial recon on remaining ~24km of strike now underway
- First drill hole in March 2020 discovered wide, shallow zone of high-grade PGE-nickel-copper-cobalt mineralisation
- >8,000km² of new licence applications since the discovery in the new West Yilgarn Ni-Cu-PGE Province (incl. >2,000km² around Julimar) – leveraging our competitive advantage to make additional discoveries
Gonneville is an exceptional PGE-nickel-copper-cobalt-gold discovery with the potential to deliver a world-class deposit.

- ~1.6km x >0.8km intrusion, open to the northwest, hosting:
  - Eleven shallow high-grade PGE-Ni-Cu-Co+/Au zones defined to date (G1-G11, using >1g/t Pd cut-off) – all remain open
  - >125 isolated high-grade (>1g/t Pd) intersections outside the eleven zones
  - Widespread PGE mineralisation associated with disseminated sulphides (0.5-2.0g/t PGEs+Au), down to ~800m below surface thus far
  - Widespread Pd-rich oxide zone (0.8-1.5g/t Pd) from surface to a depth of ~25m
  - ~200 holes for ~55,000m completed to date, assays pending for ~45 holes

- Preliminary metallurgical testwork indicates:
  - Sulphide mineralisation amenable to flotation under standard conditions
  - Oxide mineralisation amenable to oxidative leaching under standard conditions

- ~160,000m step-out and resource definition drill program ongoing – 3 RC and 3 diamond rigs
The eleven high-grade zones have **significant strike length** and extend from ~25m to ~550m below surface thus far (zones remain open)

**Julimar Nickel-Copper-PGE Project**

Gonneville G1-G11 Zones 3D View

[Looking North-West]

**27 January 2021**
The internal high-grade zones are Pd-Ni-Cu-Co rich and in some places are up to ~40m thick

G1(discovery)-G3, G5-G10 zones:
- ~3-40m wide
- Top of zones ~25m below surface
- Pd-Ni-Cu-Co rich
- Open along strike and down-dip
- 152x high-grade (>1g/t Pd) intersections to date, including:
  - 25m @ 8.5g/t Pd, 0.9g/t Pt, 0.1g/t Au, 2.0% Ni, 0.9% Cu, 0.11% Co from 46m (JRC001, G1)
  - 39m @ 3.8g/t Pd, 0.6g/t Pt, 0.3% Ni, 0.2% Cu, 0.02% Co from 290m (JD023, G1-G2)
  - 14.4m @ 7.7g/t Pd, 1.7g/t Pt, 0.1g/t Au, 1.2% Ni, 0.6% Cu, 0.07% Co from 36.7m (JD016, G1)
  - 17.6m @ 5.3g/t Pd, 1.0g/t Pt, 0.1g/t Au, 1.3% Ni, 0.6% Cu, 0.07% Co from 191.4m (JD003, G2)
  - 26.3m @ 3.8g/t Pd, 0.9g/t Pt, 0.5% Ni, 0.2% Cu, 0.04% Co from 80.7m (JD010, G2)
  - 22.7m @ 4.4g/t Pd, 0.7g/t Pt, 0.5% Ni, 0.3% Cu, 0.04% Co from 83m (JD014, G2)
  - 33m @ 2.0g/t Pd, 0.4g/t Pt, 0.5g/t Au, 0.3% Ni, 0.8% Cu, 0.02% Co from 236m (JRC060, G6)
  - 24.4m @ 3.3g/t Pd, 0.4g/t Pt, 0.1g/t Au, 0.4% Ni, 0.2% Cu, 0.03% Co from 164.6m (JD006, G2)
  - 18m @ 4.6g/t Pd, 0.5g/t Pt, 0.4% Ni, 0.1% Cu, 0.03% Co from 121m (JRC112, G10)
  - 19m @ 3.1g/t Pd, 0.7g/t Pt, 1.1g/t Au, 0.2% Ni, 0.8% Cu, 0.02% Co from 67m (JRC070, G7)
  - 13.7m @ 4.4g/t Pd, 0.9g/t Pt, 0.7% Ni, 0.7% Cu, 0.05% Co from 29.3m (JD006, G3)
The G4 and G11 zones are **Pd-Pt-Cu dominant** and are generally associated with the eastern footwall contact of the intrusion.

### G4 and G11 zones:
- ~3-50m wide
- Top of zones ~40m below surface
- ~1,000m of strike and up to 430m of dip-extent
- Open along strike and down-dip
- Pd-Pt-Cu+/Au rich
- 82x high-grade (>1g/t Pd) intersections to date, including:
  - 50m @ 1.8g/t Pd, 0.5g/t Pt, 0.9g/t Au, 0.2% Ni, 1.1% Cu, 0.02% Co from 112m (JRC089, G4)
  - 34.5m @ 2.8g/t Pd, 0.7g/t Pt, 0.4g/t Au, 0.2% Ni, 1.9% Cu, 0.02% Co from 139.8m (JD019, G4)
  - 25.7m @ 3.9g/t Pd, 2.3g/t Pt, 0.7g/t Au, 0.2% Ni, 0.8% Cu, 0.02% Co from 418.1m (JD006, G4)
  - 11m @ 13.0g/t Pd, 1.3g/t Pt, 0.3g/t Au, 0.1% Ni, 0.1% Cu, 0.01% Co from 78m (JRC121, G11)
  - 33m @ 2.1g/t Pd, 0.5g/t Pt, 0.2g/t Au, 0.2% Ni, 0.5% Cu, 0.02% Co from 81m (JRC048, G4)
  - 7m @ 13.8g/t Pd, 0.3g/t Pt, 0.5g/t Au, 0.2% Ni, 0.2% Cu, 0.02% Co from 83m (JRC064, G4)
  - 20m @ 2.9g/t Pd, 1.5g/t Pt, 0.8g/t Au, 0.1% Ni, 0.8% Cu, 0.01% Co from 97m (JRC121, G11)
  - 8m @ 2.2g/t Pd, 13.3g/t Pt, 0.1g/t Au, 0.1% Ni, 0.1% Cu, 0.01% Co from 225m (JRC073, G4)
Several exciting EM anomalies recently identified immediately north of Gonneville; initial on-ground exploration now underway.

Historical surface sampling over regional magnetics (TMI-RTP)
May 2020

Chalice 2020 Airborne EM (channel 15)
Sept 2020
>70% of PGEs used in automotive catalytic converters (pollution control devices)

**Palladium based** catalytic converters preferred to comply with stricter emissions standards

Palladium market has been in **deficit for nine consecutive years** – recent record price of US$2,856/oz reached in Feb 2020 (current spot price ~US$2,400/oz)

**Future demand** for PGEs underpinned by the rapid growth predicted in hydrogen production and hydrogen fuel cells – in particular in heavy transport and energy storage sectors
The **palladium price has surged** with the introduction of China 5/6 emissions standards and the switch from Pt to Pd based catalytic converters.
The Julimar Project has the potential to deliver **significant jobs, skills and economic diversification** to the Wheatbelt region of WA

- The proximity of Julimar to major communities provides a unique opportunity to build a **workforce of local permanent residents (drive in, drive out)**
- **Growing employment opportunities** – already having positive economic impact on local and surrounding economies
- Community Fact Sheets have been developed, providing key information on topics such as environment, community consultation, exploration licences and drilling activities
- **Active, open and transparent engagement** continues with key landowners, Shire and local community representatives
- Numerous case studies of successful major mining projects in or around State Forest areas in WA (Boddington, Alcoa WA, Worsley, Greenbushes)
- Undertaken baseline flora, fauna, heritage and dieback surveys on private land – a **proactive approach**
- Utilising low-impact exploration techniques within the Julimar State Forest
Accelerated drilling and metallurgical testwork program underway – aiming to define a **maiden Mineral Resource by mid 2021**

1. CMP Stage 1 = Conservation Management Plan – a plan outlining Chalice’s proposed non-ground disturbing exploration approach within the Julimar State Forest.
2. Access to the Julimar State Forest for drilling activities has not yet been granted. The Company continues to engage with relevant government entities to progress its CMP approval and the above timeline is an estimate only.
### 2021 Outlook – we are on track to define a maiden resource at Julimar, build trust with our key stakeholders and leverage our discovery

<p>| | |</p>

Our PGE-Ni-Cu-Co-Au discovery at Julimar in WA is shaping up to be world-class and has opened up a new mineral province – resource drill-out underway

Three rigs drilling at the Pyramid Hill Gold Project in Vic and a maiden drill program recently completed at the Hawkstone Ni-Cu-Co Project in the Kimberley

A major greenfield discovery, ~A$36M returned to shareholders to date and ~A$148M¹ in cash and investments – an excellent track record

¹ Pro forma as of 31 December 2020 (and includes SPP that settled in January 2021)
We are a dynamic and entrepreneurial group of accomplished mine finders, project builders and mining managers

Board of Directors

Tim Goyder, Chairman
- 40+ year industry veteran with track record of success as an investor, entrepreneur and company director
- Founder and largest shareholder of Chalice (~12%)

Alex Dorsch, Managing Director
- Previously a Specialist with McKinsey & Company
- Diverse experience in consulting, engineering and corporate advisory in the energy and resources sectors

Morgan Ball, Lead Independent Non-Exec Director
- Chartered Accountant with 25+ years experience in the resources, logistics and finance industries
- CFO of Saracen Minerals

Stephen Quin, Non-Exec Director
- Geologist with 37+ years mining and exploration experience in Canada and across the globe
- President and CEO of Midas Gold Corp

Garret Dixon, Non-Exec Director
- 30+ years experience in resources and mining contracting sectors
- Most recently Executive VP Alcoa & President Bauxite

Key Management

Richard Hacker, CFO
- Chartered Accountant with 20+ years experience in junior company financing and management
- Company CFO since 2006

Kevin Frost, GM Exploration
- Co-recipient of AMEC’s Prospector of the Year Award in 2009 for the discovery of the Spotted Quoll nickel sulphide deposit in WA (Western Areas)

Bruce Kendall, GM Development
- Co-recipient of AMEC’s Prospector of the Year Award in 2012 for the discovery of the world-class Tropicana gold deposit in WA (AngloGold Ashanti)

Jamie Armes, Company Secretary
- Chartered Accountant with 20+ years experience in administration of public listed companies in the mining and exploration industry

Supported by a team of ~30 FTEs (project geologists, accountants, specialist geology, mineralogy, metallurgy, mining and environmental consultants)
Since our 2006 IPO, we have acquired quality assets, advanced projects quickly and generated >A$110M in after-tax proceeds\(^1\) from asset sales.

- **2006**
  - $7.5M raised in IPO on ASX to progress Chalice & Higginsville Projects

- **2007**
  - Chalice & Higginsville Projects sold for ~A$12M (pre-tax)

- **2008**
  - ~A$43M raised to progress Zara to DFS

- **2009**
  - Zara Gold Project in Eritrea acquired for ~A$7M

- **2009-2011**
  - ~A$43M raised to progress Zara to DFS

- **2010**
  - ~A$0.10ps / ~A$25M capital return to shareholders

- **2012**
  - Zara Gold Project in Eritrea sold for ~US$114M (pre-tax)

- **2013**
  - Cameron Gold Project in Ontario acquired for ~A$8M

- **2014**
  - ~A$43M raised to progress Zara to DFS

- **2016**
  - Cameron Gold Project in Ontario sold for ~A$25M (pre-tax)

- **2017**
  - Acquired East Cadillac Gold Project in Quebec and staked Pyramid Hill Gold Project in Victoria

- **2018**
  - Staked Julimar Nickel-Copper-PGE Project in Western Australia

- **2019**
  - Quebec Gold Projects sold to O3 Mining

- **2020**
  - Major PGE-Ni-Cu-Co-Au discovery at Julimar Project

- **2020**
  - ~$130M raised to progress Julimar

---

\(^1\) As of 15 June 2020
Chalice’s portfolio includes **district-scale precious and base metal projects** as well as several royalties, investments and non-operated JVs.

**Key Projects**
- Hawkstone Nickel-Copper-Cobalt Project (85-100%)
- Julimar Nickel-Copper-PGE Project (100%)
- Barrabarra Nickel-Copper-PGE Project (100%)
- Mt Jackson Gold Project (100%)
- Auralia Nickel-Copper-Gold Project (100%)
- Viking Gold Project (70%)
- Nulla South & Gibb Rock Gold JVs (Ramelius earning 75%)
- Warrego North Copper-Gold JV (NT) (Bullion earning 75%)
- Flinders River Vanadium Project (100%)
- Pyramid Hill Gold Project (100%)

**Non-Operated Joint Ventures**
- Nulla South & Gibb Rock Gold JVs (Ramelius earning 75%)

**Key Investments**
- ~3.1M shares (~5%) in O3 Mining Inc. (TSX-V: OIII)
- ~6M shares (~10%) in Caspin Resources (ASX: CPN)

**Royalties**
- Nyanzaga, Tanzania – **A$5 million** payment receivable upon commercial production from Orecorp Limited (ASX: ORR)
- East Cadillac, Quebec – **1.0% NSR** partial
- Kinebik, Quebec – **1.0% NSR**
- Ardeen, Ontario – **0.12-1.0% NSR** partial
- Cameron, Ontario – **1.0% NSR** partial
- Jericho, WA – **1.0% NSR** capped
- Bunjarra Well, WA – **1.0% NSR** capped
Drilling at Pyramid Hill Gold Project, Oct 2019
Why gold in Victoria? The prospect of finding another **Fosterville Gold Mine**

>60Moz Au produced since 1850’s from outcropping South Bendigo Zone, at a avg grade of ~15g/t Au

90% of mines had a recovered grade >8.5g/t Au

32Moz Au (P50 mid case) of undiscovered gold to the north in the **Northern Bendigo Zone** (Vic Govt ‘Gold Undercover’ estimate)

This area is essentially unexplored – the opportunity

Historic region capturing global attention again thanks to Kirkland Lake Gold’s **ultra high-grade Swan Zone** discovery at the **Fosterville Gold Mine**:

- 2019 Production: ~619koz at ~40g/t Au
- 2019 operating cash costs guidance: US$130-150/oz
- Swan Zone Mineral Reserve (Dec-18): 2.3Moz @ ~50g/t Au

As an early mover, Chalice staked a >5,000km² essentially unexplored land holding surrounding **two world-class gold** deposits.

- The success of Fosterville has attracted **significant new players** into the district:

  [Kirkland Lake Gold]
  [Newmont Goldcorp]
  [Catalyst Metals Ltd]  
  [Hancock Prospecting]
  [St Barbara]

- Chalice positioned itself early and strategically, with a focus on:
  - **Unexplored, prospective areas** (potential world-class deposits hidden by cover)
  - **Sparsely populated** and less sensitive areas (plains of the Murray Basin) where large-scale mining feasible
The world-class gold deposits are controlled by regional scale faults, which continue to the north into Chalice’s tenure → follow the strike
Dispersion of gold and pathfinder metals such as arsenic and antimony is used to vector towards gold under cover.

Dispersion footprints of major gold deposits in Vic

Gold!
A Gold System!!

Identifying continuous dispersion over kilometres a good indicator of a large gold system beneath...

SOURCE: Duncan, R. 2019, The five key ingredients that make a world-class gold district, Geological Survey of Victoria
Chalice has adopted a **systematic value-add approach** – ‘find the big gold systems first’

- **Phase 1.** Screen the thin cover (<100m) areas with wide-spaced recon sampling + AC drilling
- **Phase 2.** Infill and vector towards targets with tier-1 scale potential
- **Phase 3.** Drill-out prospects and revisit other targets

- **Our Project covers hundreds of kilometres of prospective strike:**
  - Muckleford (>300km)
  - Mt William (>75km)
  - Percydale (>40km)

- **Prior to Chalice most of the area essentially un-drilled**

- **Our regional-scale activities commenced in mid-2018:**

  - >700 AC holes completed across ~10 targets
  - >15 lower-priority targets → drilling on hold for now
  - Focus on 2 high-priority prospects → Kari and Ironbark (2nd diamond drill program underway)
Initial geological holes have confirmed a **large gold system** at depth below the >4km long gold trend at the Karri Prospect

- **Maiden 6 hole diamond program** for structure / geology recently completed
- First ever test at depth into a ‘blind target’
- All six diamond drill holes intersected tightly folded, upright stratigraphy and primary gold mineralisation.
- Several **strike extensive anticlinal structures** identified (typical geological setting for high-grade gold deposits in the region)
- Anomalous gold intersected in all holes
- Several **high-grade gold zones** intersected ~1-2km apart
- Results indicate **potential for a tier-1 scale gold system**
- 2 diamond rigs currently drilling
The initial diamond holes provided a first glance at the geology and compelling targets for the current phase of diamond drilling.

Hawkstone Nickel-Copper-Cobalt Project

Western Australia
The Hawkstone Nickel-Copper-Cobalt Project covers 1,800km² in the frontier and largely unexplored King Leopold Orogen of the west Kimberley.

- Frontier province highly prospective for magmatic Ni-Cu-Co sulphide deposits
- Minimal modern exploration
- 2015 Merlin discovery by Buxton Resources (ASX: BUX) highlighted potential of Ruins Dolerite
- IGO Ltd (ASX: IGO) entered the region in late 2018 with a regional JV with Buxton
- Chalice a significant player in the belt:
  - 600km² Ruins Area acquired in June 2019
  - Immediately SE of Merlin (proven host)
  - 1,200km² of EL applications made in late 2018
  - Conceptual host to magmatic sulphides
Chalice’s immediate focus is the Ruins Area, where several nickel sulphide targets have already been defined.

- Merlin (IGO-Buxton) hosts drill intercepts in Ruins Dolerite with grades up to 8.14% Ni, 5.26% Cu and 0.69% Co.
- 11 airborne EM targets defined by Chalice to date along strike to SE and E of Merlin.
- Ground based MLEM completed, identifying several high-priority EM targets.
- 2 x ~5,000 Siemens conductors identified at the ~2.5km x ~1.5km Ephesus Target.
- Maiden RC drill program recently completed (assays pending).
